三、克漏字測驗【請依照段落上下文意,選出最適當的答案】

Seeing is not always believing. In this age of digital photo 41, it can be hard to tell what's real and what's not. It's common to get forwarded e-mails with attached photos of everything from freakishly large fruits to gruesome accidents. 42 some look obviously fake (a shark coming out of the water to attack an army helicopter), others make you wonder if they could possibly be real: a grown man swallowed whole by a snake or former US president George W. Bush reading a book 43 down.

But these fake photos are not just a by-product of the Photoshop era. They've been around since the early 1900s and they've fooled 44 people in the last few decades. Admittedly, those were far simpler times and people had more faith in what they saw and were a lot less 45. Nowadays people are aware of what technology can do.

四、閱讀測驗

Many people run for sport or exercise. But what if you are not a "born" runner or jogger? You may still want a sport that is inexpensive and easy to do. Why not try walking? Walking is something that almost any normal, healthy person can do. It requires no special equipment. Walking can give you many of the same benefits as jogging or running; it will just take longer. Jogging and running make your heart and lungs work harder than walking. They also put more stress on your legs and feet than walking does.

The problem with walking as a kind of exercise is that most people do not take it seriously. But there is a big difference between serious walking and the kind of walking that most of us do. Walking, like jogging, should have a steady and continuous motion.

If you are going to get your exercise by walking, you need to have your own walking program. After all, runners and joggers set goals for themselves. Walkers need goals, too.

Set a definite course to walk. Start by walking about 15-30 minutes a day. Build up your time and distance slowly. Try increasing your walking speed little by little.

If jogging or running is your sport, follow the same advice. Start off slowly. Spend most of the first few days just walking. Then start walking and running on the same day. Run or jog a short distance, then walk for a while, then run, then walk. Follow that pattern for 15-30 minutes a day. Slowly make each run longer and each walk shorter. Later on, you can increase your distance, speed, and exercise time.
