II. Cloze: Choose the most appropriate answer.

The Strange Case of Dr. Jekyll and Mr. Hyde is a well-known English story by Robert Louis Stevenson. The story is about a much-loved and brilliant man called Dr. Jekyll. Dr. Jekyll is a very good man who is aware that there is bad side to his character. 46 so many other people, he feels that the bad in him is fighting against the good in him. One day while doing research in his lab, Dr. Jekyll discovers a special mixture of chemicals which enables him to separate the bad part of his character from the good. When he drinks this 47, he actually turns into a different person. His whole nature and appearance change and he becomes the evil Mr. Hyde. When he is Mr. Hyde, he can enjoy doing terrible things without feeling any 48. Later he changes back to his self and becomes the good and kind Dr. Jekyll 49. He begins to look forward to changing into Mr. Hyde more often and he 50 murders someone. Eventually Dr. Jekyll actually changes into the evil Hyde without needing to take the mixture. One day he finds that he cannot change back into Jekyll, and he finally kills himself.

Many doctors and scientists believe that there are different causes for the different forms of cancer. Working conditions may 51 cancer. For example, people who work in 52 contact with chemical compounds like arsenic or asbestos may develop cancer. People who work for long periods of time with X-rays or radioactive material may get leukemia or cancer of the skin, bone or lungs. Smoking is 53 cause of cancer. Many experiments have shown that smoking can produce lung cancer as well as cancer of the mouth, larynx and esophagus. 54, viruses may cause cancer. Scientific research has shown that viruses bring about certain kinds of cancer in laboratory animals. Scientists are now trying to find out 55 true for humans as well. Although we don't have the answer yet, perhaps in the near future we will know what causes this disease.

- (D) 51. (A) result from (B) build up (C) count on (D) lead to
